

Round-up@ ProActive/ProVantage: Key Information

Roundup® Pro Active 360 is a glyphosate herbicide recommended for the total control of annual and perennial grasses and broad-leaved weeds in non-crop areas such as roadsides, paths, hard surfaces and along fences and walls. It is ideal for cleaning up weedy ground prior to planting or sowing, for total weed control on industrial sites and for aquatic weed control. Roundup® Pro Active is one of the few products which is safe to use in or around lakes, streams, rivers & other aquatic sites.

We also have this product in a [1L Container](#).

If you are looking for something that acts quicker and also kills Horsetail weed then look at [Diamond 1L](#). Why not brighten up the area you have sprayed with a [Wild Flower Seed Small Pack](#).

Recommended Dilution Rates		
Rate Per Hectare	Dilution Per Litre	Weeds Controlled
3 Litres	15ml per litre of water	Annual grasses, annual broad-leaved weeds
5 Litres	25ml per litre of water	Most perennial weeds
	2ml neat per stem	Stem Injection

Key Benefits:

- Total herbicide provides complete control of a vast range of broad-leaved weeds.
- Unique Bi-active formulation gets more glyphosate into the plant.
- Hazard free label - safer for the operator, public and pets.
- Superior long-term control of difficult perennial weeds.
- Biodegrades in soil and water and has excellent rain fastness.
- Highest levels of performance and safety.
- Preferred under COSHH.

Our Recommendation:

- Always read the product label before use.
- For best results mix 5g [Chikara](#) + Roundup. This will control weeds for up to 6 months.
- Avoid application when rain is forecast in the following 6 hours.
- Consider using a [Weed Wiper](#) in areas where spray drift could cause damage to neighbouring non-target plants.

- Keep livestock out of treated areas for at least 5 days after application. If you are treating poisonous plants (such as ragwort) wait for the foliage to die and become unpalatable.
- Save money and time and mix with [Blue Dye](#) to ensure no areas are missed or overdosed.
- Always wear protective clothing, such as [Chemical Resistant Gloves](#), when handling Roundup Pro Active®.

SAFE USE OF PESTICIDES

By law, everyone who uses pesticides professionally must have received adequate training in using pesticides safely and be skilled in the job they are carrying out." Upon purchasing this product you and/or the end users are responsible for ensuring that these products are used in line with industry Approved Codes of Practice. All operators must be trained and certificated in using and applying any Ministry Approved Professional Product (MAPP). Use plant protection products safely.
